EXPOSURE AND STABILITY

# Your capture settings should protect the photo before the edit begins.

Use this as a quick technical safety check before a scene starts moving or the light changes.

| | | |
|---|---|---|
| 01 | **Shutter** | Can it hold the motion? |
| 02 | **Aperture** | Does depth support the scene? |
| 03 | **ISO** | Is noise acceptable for the output? |
| 04 | **Focus** | Is the right plane protected? |
| 05 | **Exposure** | Are highlights safe? |

**Quick reminder**

Settings protect editing freedom.

**Final check**

Fix the preventable mistake before shooting.
