SLIDER LANGUAGE

Use sliders as language, not decoration.

Use this as a plain-language reference for exposure, contrast, highlights, shadows, whites, blacks, texture, clarity, and color.

01	**Exposure**	Set the basic brightness.
02	**Contrast**	Decide how much shape belongs.
03	**Highlights**	Protect the bright information.
04	**Shadows**	Open only what matters.
05	**Presence**	Add detail without making noise.

Quick reminder

A slider is a sentence.

Final check

Move it only when you know what it is saying.
