TEXTURE / GRAIN / VIGNETTE

Texture, grain, and vignette should finish the image, not become the image.

Use this before adding texture, clarity, grain, vignette, or color polish. Finishing effects should support a resolved image.

01	**Texture**	Add detail only where it helps.
02	**Clarity**	Use shape without harshness.
03	**Grain**	Support mood, not mistakes.
04	**Vignette**	Guide attention quietly.
05	**Stop**	Remove the effect if it explains nothing.

Quick reminder

Finish what is already working.

Final check

Effects should not become the reason.
