FINAL EDIT PASS

Stop before the edit starts explaining itself.

Use this when an image was already good and the final touches may be making it worse. The checklist helps stop before polish becomes noise.

01	**Natural**	Does the style still breathe?
02	**Halos**	Are edges giving it away?
03	**Color**	Did mood become color noise?
04	**Texture**	Is detail too loud?
05	**Compare**	Was it better earlier?

Quick reminder

The viewer should notice the photograph before the editing effort.

Final check

Finish should support style, not announce it.
