BEFORE THE FIRST FRAME

Field mistakes usually happen before the camera reaches your eye.

Use this as a quick pause before shooting. Many problems are visible before capture if you slow down for ten seconds.

01	**Subject**	Did you name the reason?
02	**Edges**	What is entering the frame?
03	**Light**	Is the direction helping?
04	**Timing**	Is the moment finished?
05	**Settings**	Are the basics safe?

Quick reminder

Most mistakes are visible early.

Final check

Pause before the camera becomes busy.
