FIELD SELECTION

The first obvious frame is usually just the scout.

Use this when you arrive at a location and immediately see the expected photo. The first version can be useful, but it should not automatically become the final frame.

01	**Notice**	What is too obvious?
02	**Move**	What changes from three steps away?
03	**Wait**	What timing could improve it?
04	**Subtract**	What does the frame not need?
05	**Return**	Is the first one still strongest?

Quick reminder

Take the obvious frame if needed, then earn a better one.

Final check

A scout frame is information, not a verdict.
