PROFILE RHYTHM

Your grid should read like a magazine page, not a storage folder.

Use this to plan a profile grid with visual rhythm. The aim is a useful flow, not a folder dump.

01	**Hero**	Which frames need space?
02	**Pause**	Where can the eye rest?
03	**Detail**	What keeps the grid human?
04	**Color**	What palette connects the set?
05	**Order**	What should appear next?

Quick reminder

A grid is pacing.

Final check

Let strong images breathe.
