LIGHT AWARENESS

Photograph what the light is doing.

Use this when a scene looks attractive but the photo still feels flat. The checklist moves attention from object-hunting to light-reading.

01	**Direction**	Where is it coming from?
02	**Quality**	Hard or soft?
03	**Shape**	What does it reveal?
04	**Shadow**	What does it hide?
05	**Color**	What mood is built in?

Quick reminder

A subject without useful light is only information.

Final check

Read the light before judging the object.
