LIGHT TIMING

Evening light changes job every few minutes.

Use this from golden hour into night. The map separates glow, color, mood, and darkness so one edit recipe does not flatten every phase.

01	**Gold**	Protect glow
02	**Sunset**	Control color
03	**Blue**	Preserve mood
04	**Night**	Keep darkness
05	**Shift**	Change the edit path

Quick reminder

Evening is a sequence, not one lighting condition.

Final check

Change decisions when the light changes job.
