AFTER DARK

Night editing is not about showing everything.

Use this when a night photo feels muddy, noisy, or over-rescued. Night needs hierarchy more than cleanliness.

01	**Subject**	What must remain readable?
02	**Highlights**	Protect signs, lamps, and windows.
03	**Color**	Keep night color believable.
04	**Noise**	Soften it; do not erase the scene.
05	**Black**	Let some areas stay quiet.

Quick reminder

Show the right things.

Final check

Darkness is part of the image.
