SELECTION DISCIPLINE

Editing time belongs to images with a real core.

Use this when you are tempted to rescue a file with more editing time. The checklist helps decide whether the image has a core worth protecting.

01	**Core**	What is worth protecting?
02	**Problem**	Is the issue solvable?
03	**Potential**	What can editing reveal?
04	**Cost**	How much time will it take?
05	**Stop**	Is another file stronger?

Quick reminder

More time should serve a stronger core.

Final check

Do not reward weak images with your best attention.
