STRUCTURE FIRST

In cities, structure comes before decoration.

Use this when a city scene has too much going on. Start with structure, then decide what movement and detail should stay.

01	**Anchor**	What holds the frame together?
02	**Lines**	Where do buildings and paths lead?
03	**People**	Do they explain scale or distract?
04	**Edges**	Clean the corners before shooting.
05	**Wait**	Let movement land in the right place.

Quick reminder

Order first. Decoration second.

Final check

A busy city still needs hierarchy.
